These notes give an overall guide to your procedure. You may see some differences in the details of your treatment, since it is tailored to suit your own condition.
require surgical removal ("thrombectomy") if it is severe. There may be some lumpiness under the skin where the veins have been removed. This settles down. The leg may take 6 months or more after the operation to reach its best. You must appreciate that the leg can seldom be made ‘completely normal’. The operation tries to limit the damage done and improve the cosmetic appearance. The damage already done may improve slightly. Usually the symptoms caused by the varicose veins are very much improved.

WHAT ARE THE ANAESTHETIC RISKS INVOLVED?
You can discuss the type of anaesthetic you will have with your anaesthetist and also the possible complications that may occur.

WHAT SHOULD I DO BEFORE THE OPERATION?
You should not eat or drink anything for at least six hours before your operation. However, you should take all your regular medication as usual on the day. Your surgeon may want you to stop certain medication such as aspirin, warfarin, or other blood thinning medicines before the operation.

WHAT HAPPENS BEFORE THE OPERATION?
Please report to the hospital reception on time for your admission. Please bring along all the documents that may be required such as your medical aid card, ID and contact details. If you are not a member of a medical aid you will be required to pay a deposit or to sign an indemnity form. As far as possible we will try to advise you about hospital costs before your admission. It may be best to complete some of the documentation beforehand at the hospital pre-admission clinic to save time on the day of your admission.

When you arrive in the ward, you will be welcomed by the nurses or the receptionist and will have your details checked. Some basic tests will be done such as pulse, temperature, blood pressure and urine examination. You will be asked to hand in any medicines or drugs you may be taking, so that your drug treatment in hospital will be correct. Please tell the nurses of any allergies to drugs or dressings. The surgeon will have explained the operation and you will be asked to sign your consent for the operation. If you are not clear about any part of the operation, ask for more details from the surgeon or from the nurses.

In an adult the operation area may need to be shaved to remove excess hair. You may be issued with compression stockings that will help prevent blood lots in your legs. If you are having a general anaesthetic, the anaesthetist who will be giving your anaesthetic will interview and examine you and he may put up a drip or prescribe some medication to help you relax.

You will be taken on a trolley to the operating suite by the staff. You will be wearing a cotton gown, wedding rings will be fastened with tape and removable dentures will be left on the ward. There will be several checks on your details on the way to the operating theatre where your anaesthetic will begin.

WHAT HAPPENS WHEN I WAKE UP?
After the operation is completed you will be transferred back to the ward. Although you will be conscious a minute or two after the operation ends, you are unlikely to remember anything until you are back in your bed on the ward. You may have a some pain, and your legs will be bandaged firmly.

WILL I HAVE PAIN?
Some pain may be present, but this should be controlled to a level of mild discomfort with the painkillers that are prescribed. Ask the nursing staff for medication if you have pain.

HOW SOON AFTER THE OPERATION CAN I EAT?
As soon as the anaesthetic has worn off and you feel comfortable.

HOW SOON AFTER THE OPERATION CAN I GET OUT OF BED?
You will remain in bed until the morning after surgery.

HOW LONG WILL I STAY IN THE HOSPITAL?
Usually overnight.

WHAT HAPPENS WHEN I AM DISCHARGED FROM THE WARD?
Your surgeon will determine when you are ready to go home. You will be given some medication for pain. You will be given instructions on the dressings and how to care for the wounds. You will also get an appointment for your follow-up in the surgeon’s rooms. You should ask for a sick certificate if you need this for your employer.

WHAT SHOULD I BE AWARE OF WHEN I GET HOME?
If there is increasing wound pain or swelling, if you notice fresh blood on the dressings, you must contact the surgeon immediately. If your leg swells up suddenly, or becomes blue or very painful, call your surgeon.

HOW SOON CAN I START EXERCISE?
You should not exert yourself much until your surgeon allows you to. You should walk as much as you can every day.

HOW SOON CAN I DRIVE A CAR?
10 days

HOW LONG WILL I BE OFF WORK?
Usually between 7 to 10 days.

WHAT ABOUT PAYMENT?
The procedure and its associated costs will have been discussed with you, and a quote provided. Where procedures need to be unexpectedly altered during the course of the operation, the fee may change. Similarly, emergency procedures may incur an additional cost.

Surgeons are highly trained, highly skilled professionals and throughout your care a member of the practice is available to attend to you 24 hours a day. In return we expect prompt payment of your account. We do not submit accounts to medical aids.
